Wolverine Bowl Natural Avalanche, Bridger Range

Wolverine Bowl
Bridger Range
1/15/2024
Code
Latitude
45.83010
Longitude
-110.93400
Notes

From obs: "Wind slabs at the top of the ridge approximately 4-8 inches deep. Continued wind loading down the wolverine bowl, slabs softer the lower you go. Snowpack has about 1.5 feet of facets with a hard layer on top. New snow building up on top of that layer. Saw one small natural avalanche nearby, appeared a day old."
