Natural on Ridge North of Blackmore

Mt Blackmore
Northern Gallatin
2/20/2021
Code
SS-N-R3-D2.5-O
Elevation
9100
Aspect
N
Latitude
45.45310
Longitude
-110.99700
Notes

From Obs: "Driving back from Grotto Falls trailhead, from the east side of the reservoir I could see this slide on the ridge that extends north from Blackmore above Blackmore lake. The slide was on a north-facing slope around 9,100', large enough to see with the naked eye and clear as day with binoculars. The crown looked multiple feet deep and either meandered, partially hidden from view, by another ridge or a substantial second avalanche a hundred feet away."

Number of slides
1
Number caught
0
Number buried
0
Avalanche Type
Soft slab avalanche
Trigger
Natural trigger
R size
3
D size
2.5
Bed Surface
O - Old snow
Problem Type
Persistent Weak Layer
