Skier triggered, Wyoming Bowl near Big Sky

Date
Sat, 01/21/2023 - 08:00
Activity
Skiing

From Big Sky Ski Patrol 1/21/23: "skier triggered a surface wind slab in Wyoming Bowl that broke 8-12” deep. It propagated to an estimated 150’ wide- SS, R1/D1.5... The slide was small, no one was hurt, and the avalanche was reported (which we appreciate), with no further public involvement other than the trigger."

Region
Northern Madison
Location (from list)
Lone Mountain
