Avalanches on Miller Ridge

Date
Mon, 02/26/2024 - 14:55

From IG message: “These are on the ridge between Miller Mtn and Sunset Peak on North aspect. All of the North facing ridge of Miller Creek up to Miller Mountain had similar slides too. The crowns filled back in overnight… The North facing ridge on Sheep Mtn slid as well, not sure on the trigger but a rider from another group send the following image of the Sheep slide“

Region
Cooke City
Location (from list)
Miller Ridge
Observer Name
John Padilla
