Some faceting near IP

Date
Sun, 11/10/2024 - 09:35
Activity
Snowmobiling

Quick loop on the sleds around Black Canyon. 50 cm (~20 inches) of snow at 8000'. Good layer of surface hoar on top, and the upper part of the snowpack is starting to facet. Non-issue for now with snow coming this week that could double the snowpack.

South facing slopes have some damp snow.

Region
Island Park
Location (from list)
Black Canyon
