Specimen Creek Natural Avalanche

Specimen Creek
Southern Gallatin
12/26/2020
Code
SS-N-R1
Latitude
45.02650
Longitude
-111.04800
Notes

From email: "Went for a tour today on specimen ridge in yellowstone park. Stuck to terrain well below 30 degrees. Widespread whumphs throughout tour. Cracking and collapsing snowpack on small convexities. Observed multiple small avalanches on windloaded slopes. I believe they were triggered remotely by game."
