Natural Cornice break and wet loose in Alex Lowe Basin

Alex Lowe Peak Northern Gallatin 3/15/2020 Code WL-NC-R1-D1-I Latitude 45.42530 Longitude -111.01200 Notes

From the Blackmore/Elephant saddle I observed what looked to be a less than a day old <u>cornice</u> break which triggered a loose wet <u>slide</u> in front of it. The <u>cornice</u> debris was large, about the size of a VW beetle. Also observed some surface hoar on the north side of the saddle.
