

Maid of the Mist and Palace Butte

Date

Thu, 01/26/2023 - 12:00

Activity

Skiing

Skied from the summit of both Palace Butte and Maid of the Mist. Based on seeing no signs of snow instability and good terrain selection we had a grand day in the mountains. There was approximately 25 cms of new, dense snow. The SW Montana faceted snow at the ground resides every where we skied and snow above this layer is obviously well bonded.

Region

Northern Gallatin

Location (from list)

Maid of the Mist

Observer Name

David Combs
