

Natural avalanche, hyalite peak

Date

Thu, 12/21/2023 - 21:35

Activity

Skiing

Pretty sure that's an avalanche. Thought it might be goat tracks or something but you can see where some debris went through the slope below the cliff. The left side looks like it could've gone recently, but I couldn't really tell.

Region

Northern Gallatin

Location (from list)

Hyalite Peak

Observer Name

Jake Schack
