Hot in the Bridgers

Date Fri, 04/05/2024 - 07:25 Activity Skiing

Toured up to fairy lake this morning, found a somewhat frozen snowpack that rapidly warmed. 830am was when we dropped in, @9000 we found a isothermic snow pack that had only around 3-4 of frozen snow over very warm slush. Rockfall started around 900am.

Region Bridger Range Location (from list) Fairy Lake Observer Name Jay Alford
