

E Henderson Crown Profile

Date

Tue, 12/31/2024 - 12:40

Activity

Skiing

From email: "We popped over to the recent avalanche on the east side and got a crown profile. Avalanche is NE facing, 10090. HS-N-D2-R4-O

Crown is 105 cm deep, breaking on [surface hoar](#). Details are in attached profile

Something noteworthy.. the slope angle at the crown is 30.1 degrees."

Region

Cooke City

Location (from list)

Henderson Mountain

Observer Name

J Mundt
