

Natural Avalanches in Wolverine Bowl

Wolverine Bowl

Bridger Range

2/5/2025

Code

SS-N

Aspect

E

Latitude

45.83010

Longitude

-110.93400

Notes

After skiing Bradley's Meadow, we skied north into Wolverine Bowl aiming to go up the backside of Texas Meadows. When we were in the large flat meadow to the north of Hourglass Chute we heard two avalanches come down from the ridge a few hundred yards north of Hourglass. Too low of vis to estimate size or see anything but the powder clouds come over the bottom cliffs.

Number of slides

2

Number caught

0

Number buried

0
