Wind:

Stability Test Notes:
Layer n
99-10

Specifics**We skied slope. Ski tracks on slope.**
Notes:**Below 75cm snowpack is mix of slabs, crusts, and facets. Pit very close to pit dug by Karl and Doug on Dec.17. If any snowpack is worse and still waiting for load. Fx's at 80 similar to what I found in Frazier on 12/26**

This snowpit was dug where the "X" on the photo below (Saddle Peak Avalanches). The ECT is a propagation test and showed that the slope had the properties to avalanche.

Advisory Region
Bridger Range
Bridger Range, 2010-01-12
