

2016 Season Summary

Submitted by Doug Chabot on Thu, 04/14/2016 - 13:32

Greetings:

The Gallatin National Forest Avalanche Center just wrapped up 26 years of operation. We started the season with the threat of a dry El Nino winter which never materialized and finished with a snowpack measuring close to 100% average. March got almost as much snow as January and February combined.
