

Small avalanche triggered under Dribbles Ice Climb in Hyalite

Hyalite - main fork

Northern Gallatin

2/5/2020

Code

SS-AFu-R1-D1

Aspect

SW

Latitude

45.44720

Longitude

-110.96200

Notes

"Additionally, on Wednesday my climbing partner and I dug an informal pit because we were concerned with accessing the lower pitches of the dribbles from the point the bootpack ended. We noticed that sugary layer some ways down and went around..when we tried to come up the from the southwest I caused another small [slide](#) that was significantly deeper than the one I sent you (2/02); I feel like if it had happened from where people normally cross to climb Dribbles it could have been bad."

Number of slides

1

Number caught

0

Number buried

0

Avalanche Type

Soft slab avalanche

Trigger

Foot penetration

Trigger Modifier

u-An unintentional release

R size

1

D size

1

Slab Thickness units

centimeters

Single / Multiple / Red Flag

Single Avalanche

Advisory Year

[19-20](#)
