

On 2/9/20 We saw deep avalanche crowns on the west side of the Bridger Range in almost every drainage from Saddle Peak to Ross Peak. These broke at various times throughout the recent storm that deposited 4 feet of snow with over 4" of SWE in the last week. Photo: S. Cotton

Advisory Region  
Bridger Range  
Longitude  
-110.93W

Latitude

45.81N
