Natural avalanche in Cooke

COOKE CITY

Cooke City

3/25/2020

Code

SS-R2-D1.5

Latitude

45.02020

Longitude

-109.93800

Notes

From email on 3/27/2020: "natural <u>slab</u> avalanche I observed today near Cooke City. An easterly <u>aspect</u> around 9,400'. I'd estimate the crown to be 2-3' deep and about 100' wide. Looks like it was triggered by a <u>cornice</u> fall (2-3 days ago?)."
