

Blackmore, south end of the east face, 9600'

Date

Fri, 02/19/2021 - 09:30

Activity

Skiing

I toured into Blackmore with a client this morning and observed an old snow avalanche at 9600' on the east face of Mt Blackmore. I was there the day before and didn't see any evidence of avalanche activity; strong overnight winds with ample snow available for transport appeared to be enough to tip the scales.

Region

Northern Gallatin

Location (from list)

Mt Blackmore

Observer Name

Ty Guarino
