

Mt. Evans cornice triggered avalanche

Date

Tue, 02/01/2022 - 11:45

Activity

Snowmobiling

Snowmobilers reported seeing a large avalanche that appeared to have been triggered by a cornice fall on the east side of Mt. Evans in the east Pintlers, and it ran to the bottom of the bowl that most folks ride in at the head of 12 mile creek.

Region

Butte Area

Observer Name

Will Shoutis(secondhand)
