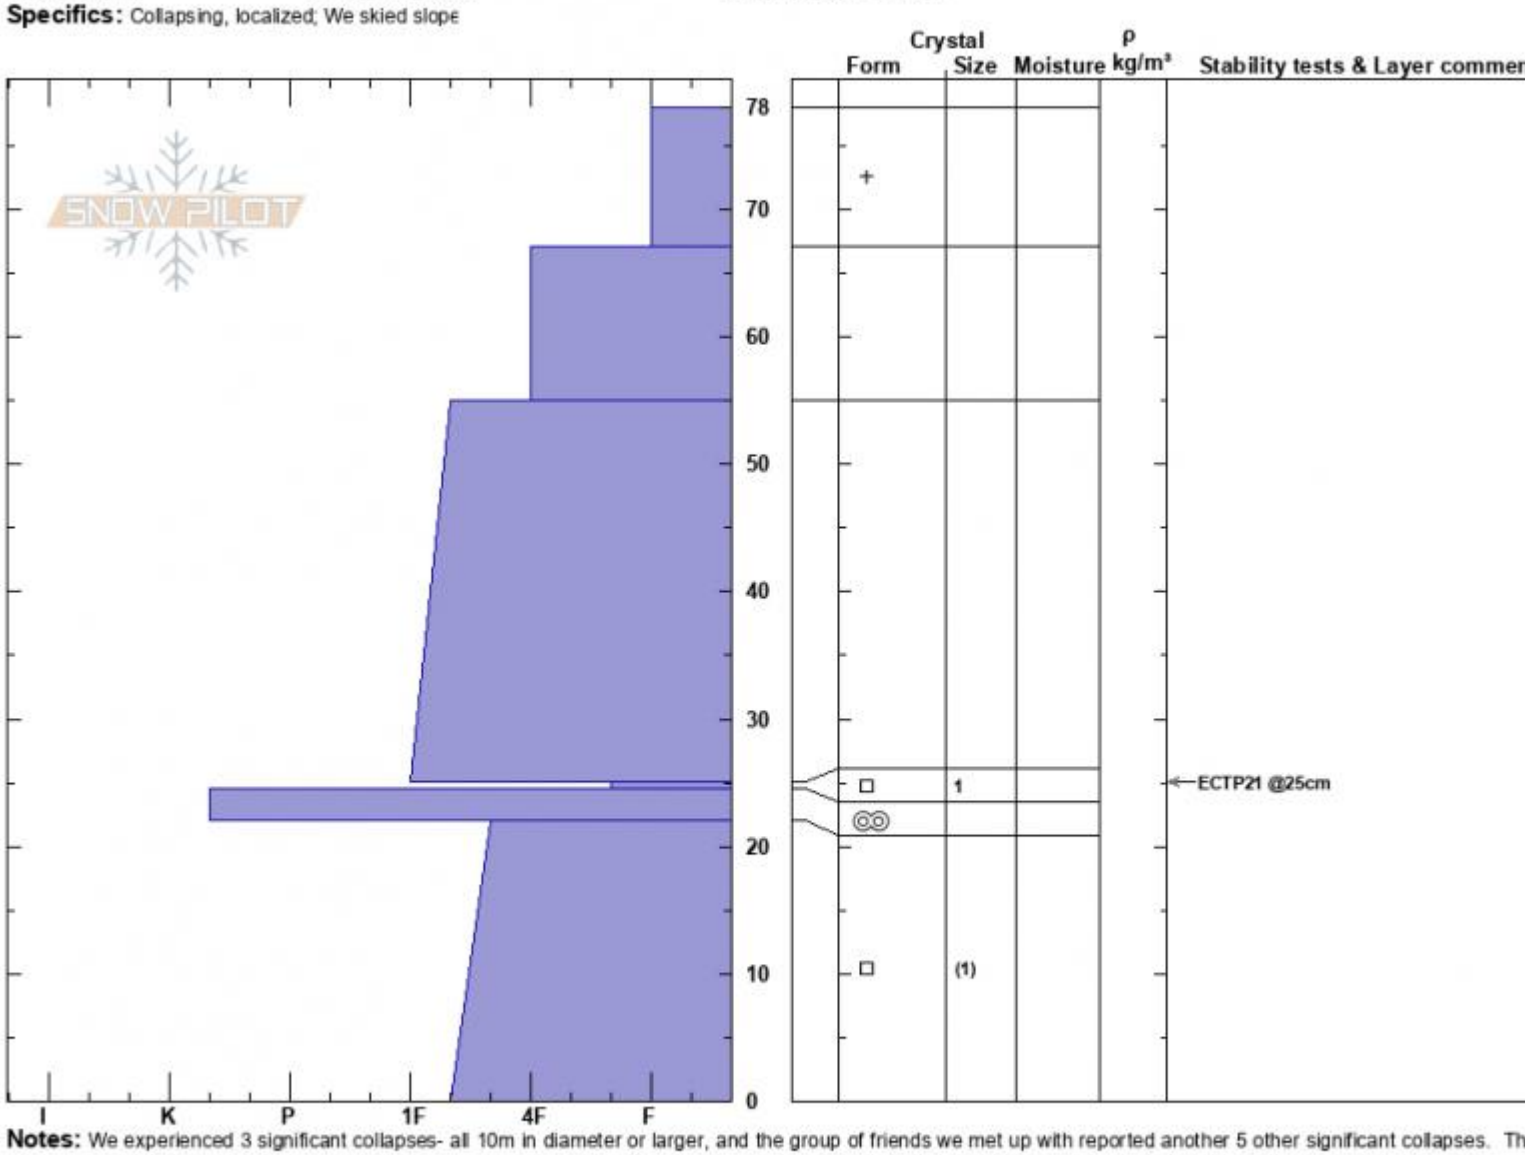
**Co-ord:**
**Slope Angle:** 25°
**Wind Loading:**

**Stability:**
**Air Temperature:**
**Sky Cover:** CLR
**Precipitation:** NO
**Wind:** Light Breeze

**HS:**78

**Layer Notes:**
**25-24.5cm:** Problematic layer



**Notes:** We experienced 3 significant collapses- all 10m in diameter or larger, and the group of friends we met up with reported another 5 other significant collapses. Th collapses were during repeatedly recycling the same skin track.

On a nearby NE aspect around 9100' (on Miller Ridge )we were finding a HS 70-80cms, and also had one significant collapse there too.

No avalanche activity to report. Minimal wind effect of new snow, great early season skiing on certain slopes above 9k'.

Advisory Region
Cooke City
Longitude
-109.95W
