

Small remote trigger on history rock

History Rock
Northern Gallatin
2/14/2023
Code
SS-ASu-R1-D1
Latitude
45.48920
Longitude
-111.00500
Notes

Was about 80% of the way up to the top of the middle meadow on history rock this morning when we remotely triggered a small avalanche from the skin [track](#). [Slide](#) was just new snow that had fallen within prior 24hrs. Crown of about 8 inches, 20ish feet wide by 20 feet long. Face that slid was east facing. We took this as a sign to reconsider skiing something even as low key as history rock and decided to ski the skin [track](#) back.

[Dropped the pin for this observation exactly where I believe the observation to have occurred. Took an OnX waypoint while out there to help too.]

Number of slides
1
