

Maid of the Mist

Date

Sat, 02/18/2023 - 16:00

Activity

Skiing

On Saturday (2/18) we toured into Maid of the Mist and dug a pit on a northern aspect at the base of the skinny maid. Our results indicated that where there was wind loading, it was very likely to fail and propagate. In addition to the ECTP 1 on the wind slab, we noticed shooting cracks on isolated pockets of wind loading.

Region

Northern Gallatin

Location (from list)

Maid of the Mist

Observer Name

Erich Schreier
