

Evidence of Avalanche Activity on Mount Bole

Date

Wed, 12/13/2023 - 13:00

Activity

Ice Climbing

We were ice climbing on Mummy 3 and 4 yesterday and as we looked across the valley to Mount Bole, we could see evidence of avalanche activity on the NE aspect of the peak. It looked quite big in length but could tell a depth from that far away.

Region

Northern Gallatin

Location (from list)

Mt. Bole

Observer Name

Ryan Dorn
