

Thin wind slab in Maid of the Mist

Maid of the Mist
Northern Gallatin
1/19/2025
Code
SS-AS-R1-D1-I
Latitude
45.41640
Longitude
-110.97000
Notes

From obs. 1/19: "Wind was swirling in Maid of the Mist yesterday, mostly upslope winds that were transporting snow, but inconsistently and were difficult to predict where they were [loading](#). We did not find widespread [wind loading](#), but did get a very small windslab to release just below the top of the ridge (max 3-4" thickness, see image)."
