

3/11/14 Slide on Crown Butte that caused a fatality

3/15/14 Human triggered deep slab ¼ mile NE of Daisy Pass
1 caught - deployed air bag, no injuries

These sides failed on slopes with a similar aspect and elevation. Both were triggered by snowmobilers. Human triggered deep slabs are a major problem around Cooke City right now. Once triggered, deep slab avalanches often produce high consequence situations. Photo J. Kunzman
