Snow Pit Profile
Ski Hill

Observer: Eric Knoff Fri Dec 19 23:28:00 MST 2014

Wind loading: previous

Stability on similar slopes: Fair Air Temperature: C Sky Cover: sky 8/8 covered Stability Test Notes: Layer note 58-59: Pro

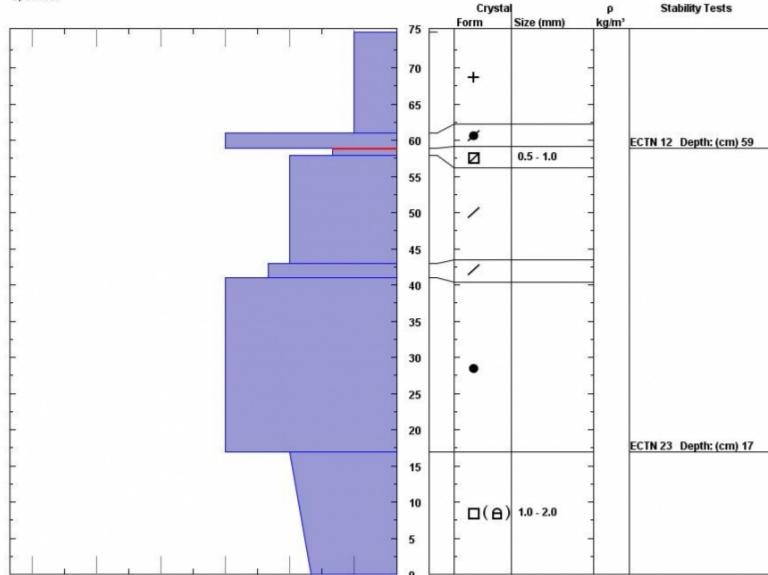

41-43: Dirt

Lionhead, MT Elevation (ft) 8400 Co-ord: N W Slope: 23

Precipitation: Snow < 0.5 cm/hr

Wind: W Moderate

I K P 1F 4F F
Notes: Facets near the ground were getting stronger. The LOC is the layer of NSF about 8" below the surface. This layer wasn't fully developed, but is we to potentially cause problems with a big enough load.

Advisory Region Lionhead Range Lionhead Range, 2014-12-28
