 Slope Angle: 33°
 Wind Loading: previous

Stability: Fair
 Air Temperature: -7°C
 Sky Cover: OVC
 Precipitation: NO
 Wind: **W Moderate**

HS140
 Stability Test

Notes: I would not have skied the steepest part of this slope.

This week's new snow buried a layer of facets sitting on an ice crust on a south facing slope off Henderson Ridge. This layering does not seem to be widespread, but the low test scores with a growing wind slab are enough to cause concern. Photo: GNFAC
