Cornice Triggered Avalanche on Mineral

Date Thu, 02/13/2025 - 16:45

Noticed a large <u>cornice</u> triggered avalanche on Mineral Mtn today. Likely broke on 2/12 or early am 2/13. E <u>aspect</u> ran almost to the valley floor. Active <u>Loading</u> today with Strong Gusts from N-S. There were some other small <u>cornice</u> avalanches to the north of this <u>slide</u> that did not trigger larger avalanches.
