

Skier triggered and natural wet loose near Cooke

COOKE CITY

Cooke City

4/7/2025

Code

WL-ASc-R1-D1.5-O

Elevation

1000

Aspect

SE

Latitude

45.02020

Longitude

-109.93800

Notes

Skiers triggered D1-D1.5 wet loose on SE [aspect](#) at 10,000'.

There were also natural small wet loose slides today and yesterday. Long running, but narrow, in steep terrain. Typically initiated near rock outcrops.

Today was hotter than yesterday and the top of the snowpack got pretty wet before clouds built in the afternoon. Snow stayed dry on due north up high.

Number caught

0
